Office Action Summary

Art Unit: 2124

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5, 7-9 and 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aiken et al (A PARALLEL PIPELINED DSP PROCESSOR CORE).

Aiken et al disclose, e.g., see Fig. 2, the invention substantially as claimed, including: parallel processing cells (PPC) and a processing and communicating tree (PCT). It is noted that Aiken et al do NOT disclose the claimed "combination phase computing element"; however, the "processing and communicating tree" (PCT) could provide the equivalent functions as claimed. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to design the invention as claimed according to Aiken et al's teachings because the reference discloses a parallel pipelined DSP processor for performing FFT.

2. Claims 4, 6 and 10-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan V. Mai whose telephone number is (703) 305-9761. The examiner can normally be reached on Tue-Fri from 6:30am to 5:00pm.
